

FGPC Program Fee PRORATING POLICY

Updated October 17, 2018

Calculations/ Formula

- The prorated amount is equal to a percentage of the full fee (the fraction of remaining time in the program).
- The calculation is as follows:

Prorate Fee Amount = (original price x time remaining/total time)

Example: A Paddler who enrolled in a program with an original fee of \$349, running 5 months, who started 1 month late:

$$(349 \times 4/5) = \$279.20$$

Rules/ Regulations

- Pro-rating of a program fee begins one month after the start date of the program.
- **Paddlers who registered in the first month of their program, but did not make payment arrangements, DO NOT qualify for the prorated fee. Pro-rating is only an option for new registrants after the first month of the program.**
- **Pro-rating is calculated on full months of the program. Half month calculations are not permitted. If a client is registering part way through the month they can either pay for the entire month (pro-rate calculations will then be back-dated to the beginning of the month) or they can wait until the start of the next month to begin paddling (and have the calculations for pro-rating start on that date).**
- ****Pro-rating past 50% of the total program rate (full season) is not permitted****
