Multi Program Registration Discount and Refund Policy

On the occasion where a paddler wishes to register for multiple programs, the discounting of an extra program is available based on the following conditions and prerequisites:

- The paddler must already be registered in a full (2x per week or more, as applicable) program.
- The discounted fee for additional registrations in parallel programs is calculated at 60% of the normal fee for each extra program

Example:

A paddler is registered for the 2x per week Daytime recreational OC program ($325 for the 2 practices per week, Tuesdays and Fridays), and wishes to add a third session per week by registering for the Sunday recreational program (regular fee = $215). The discounted fee for the extra practice would be calculated at 60% of the regular fee = $129. The full fee paid would be $325 + $129 = $454

Refunds of Multi Programs

In the situation where a paddler who has registered for multiple programs decides to withdraw from the full (2x per week or more) program and wishes a refund for the unused portion of that program, the refund is calculated as such:

- The refund would be the original full program fee, less the difference between the reduced fee and the normal fee of the extra program

Example:

A paddler who has paid $325 for their full program fee, and $129 as a discounted fee for an additional program, decides to withdraw from the full program (and stay in the extra program) would be eligible for a refund of $325 less ($215 - $129) = $239. This results in the retained fee for the single program = $215.
